PROJECTS

Projects

Employee Management

- This project created a structure for part-time and full-time employers.
- It was created for an employer to gather their employee's information like their first and last name, employee ID, and payment.

Revenue Management

- analyze internal data, market supply, and customer demand to calculate the ideal rates for your rooms. This allows you to optimize pricing across your distribution channels from one centralized dashboard

OTHER SKILLS

Technical skills

- Javascript,
- Python
- C#
- Html and CSS
- Time Management
